CO-HOSTED
BY

JOIN US

Welcome to the 4th edition of the Linux App Summit for growing and promoting the Linux app ecosystem across the globe! LAS brings together people all across the Linux application development process, working on everything from packaging and technical development through to supporting communities and building businesses.

This year's conference will be held in person in Rovereto, Italy with live streaming for our remote attendees. Rovereto is an old fortress town in the autonomous province of Trento in Northern Italy. Near the southern edge of the Italian Alps, it is the main city of the Vallagarina district.

AREAS OF FOCUS

EXPAND PARTNERSHIPS

The growth of Linux-based hardware in consumer-grade laptops, corporate computing, data centers, and mobile devices proves the importance of investing in the Linux app space. App stores are offering thousands of applications and games. This ecosystem provides a wide offering that boosts productivity, meets needs, and provides entertainment while empowering users by protecting privacy and offering choice. LAS is the best opportunity to meet others working within the app ecosystem and forging the connections you need to move your projects forward.

PLATFORM DIVERSITY

There are options for however you like to work. Whether you prefer GTK, Electron, or Qt, whatever your favorite programming language is, and however you like to package and distribute your apps, you have a place at LAS. Conversations are inclusive of all technical topics.

TECHNOLOGICAL EXCELLENCE

The Linux app ecosystem is the birthplace of foundational platform innovations that are present in the contemporary Linux operating system. Software like WebKit, D-Bus, and Wayland were incubated in the apps ecosystem and are an indelible part of how we use technology today. We continue this exploration of technical excellence through new developments, including advancements in containerized applications.

COMMUNITY

The Linux app community started in 1996 with the goal to revolutionize how we use computers. Today KDE, GNOME, and numerous other organizations and individuals still dream of building the best interface for modern computing. Turning this dream into reality requires a strong engineering vision and grounded goals, which must be powered by an open and diverse community. LAS and the Linux app ecosystem value all contributions and contributors, regardless of their skills, level of experience, or background. Sharing community challenges and collaboratively building best practices is necessary for building strong communities.

GAMING

With the contributions from Valve (Steam and Proton), and with community gaming initiatives such as Lutris/Wine, gaming on Linux is continuing to gain momentum. We're excited to bring this new area of focus to LAS 2022 and dive into conversations around new projects pushing gaming on Linux forward and how the free desktop can succeed in the gaming realm.

SPONSOR LAS

Sponsor the Linux App Summit 2022! In addition to Linux workstations, we are seeing Linux based applications appearing on all types of devices, including mobile devices and kiosks. Supporting LAS is a way for you to support the Linux app ecosystem and get your organization and branding in front of hundreds of app builders, growing companies, and people passionate about technical, organizational, and community excellence.

Your sponsorship helps fund a conference that is at the intersection of user-experience, software development, and hardware distribution. The Linux App Summit is a unique conference focused on an emerging market. It enriches the Linux app community, a necessary step for the future of technology and wider adoption of Linux and open source.

There are several ways you can support the conference and gain maximum exposure for your organization. We have a range of sponsorship levels to meet any budget starting at 750 euros. If you're interested in a custom sponsorship package, contact us at sponsors@linuxappsummit.org.

TRENDSETTER

5,000 €

- All items from FRIEND level
- Special mention during opening remarks
- Thank you on social media
- Four seats at sponsors dinner
- 45 minute "virtual office hours" in event schedule
- Booth at conference
- 10 min talk during opening ceremony
- 5 min talk during closing event

BACKER

2,500 €

- All items from FRIEND level
- Special mention during opening remarks
- Thank you on social media
- Two seats at sponsors dinner
- 45 minute "virtual office hours" in event schedule
- Booth at conference

FRIEND

750 €

- Logo on conference materials
- Logo on website

COFFEE BREAK AND HAPPY HOUR
